

PROFILE

Resourceful and creative professional with a Mathematics B.Sc. and extensive experience in data analysis, research and technology.

- Proactive, independent and highly motivated, with strong problem-solving skills and a high sense of ownership.
- Creative and analytical thinker, with the ability to approach complex problems from different perspectives.
- Curious, tech-savvy and fast learner, able to quickly understand new domains and acquire new skills.
- Positive and open-minded team player, with extensive experience teaching, presenting and communicating complex ideas to diverse audiences.

PROGRAMMING SKILLS

- Python - Pandas, NumPy
- SQL - PostgreSQL
- R - Tidyverse
- Git, GitHub
- JavaScript, TypeScript, React
- Databricks
- Spark
- Snowflake
- Astro, Supabase, Tailwind CSS
- Webhooks, APIs & Integrations

EXPERIENCE

Independent Technical & Business Projects / Tech by Naama & Bread by Naama 2025 – 2026

- Designed and implemented full-stack web applications, spanning architecture, frontend, backend, databases, UX/UI, and deployment.
- Integrated third-party APIs and services, including payment processing, email, analytics, and external data sources.
- Developed business logic, automated workflows, and data flows, aligning technical decisions with real-world operational needs and constraints.
- Built and tested alternative product flows, using experimentation and user behavior data to iteratively improve the experience.
- Researched new domains, technical and non-technical alike, and translated findings into new products and business opportunities.
- Built Bread by Naama into a standalone business, combining technology, product development, operations, and customer acquisition, with B2C as well as B2B customers across cafés, catering businesses, delicatessens, and high-tech companies, including Riskified.

Riskified / Senior Data Analyst 2019 – 2024

- Translated insights into features and segments to improve model effectiveness within strict timeframes.
- Identified trends and blind spots through in-depth and ad-hoc analysis to improve system capabilities.
- Delivered monthly reports and insights to C-level stakeholders.
- Managed the operations of a significant cost-reduction platform, including KPIs, workflow objectives, analytical logic and ongoing maintenance.
- Represented the operations department's technology needs as a Data Guild lead, working to improve performance and drive cross-company standardization and alignment.
- Handled major organized fraud attacks end-to-end.

Ben-Gurion University in the Negev / Research Assistant 2017 – 2018

- Conducted research into theoretical Computer Science topics under the guidance of Professor Michael Codish.
- Developed compact and consistent constraints to minimize search space.
- Applied new concepts to existing problems and extended previous results.

EDUCATION

Ben-Gurion University in the Negev / Mathematics B.Sc. 2015 – 2018

Graph Theory, Code Theory, Game Theory, Probability, Algorithm Design, Automata & Formal Languages, and more.

ELSE

IDF / Senior Tank Instructor 2010 – 2012

Managed the professional, social and logistical aspects of the instructor team. Received Outstanding Soldier decoration.

The Society of the Protection of Nature / Hiking instructor and School Tutor 2009 – 2010
